Asia Technology Transfer Organization (ATTO) Mission & Vision

Mission:

ATTO's mission is based on the belief that there is but one world of technology. The world is the heritage of all mankind and should be, therefore, united. ATTO is committed to originate and develop new mediums of technology transfer, ultimately contributing to the creation of an Asian intellectual community.

Vision:

The Asia economy is expected to continue to be an engine of growth for the world economy, and thereby increasing demand for technological competence on the part of Asian engineering professionals as well. This will also create a demand for enhanced human resource development and management system.

ATTO is dedicated to creating a highly efficient and innovative network of technology transfer which will be responsive to the present and future needs of Asian engineers and scientists. ATTO is a premier disseminator of information on new developments in the constantly changing world of technology and science. It also fosters vital interaction and networking among Asian engineers/scientists reaching far beyond the boundaries of nations and professional disciplines. ATTO also facilitates the development and implementation of education & training programs as well as the arrangements of joint venture partnership.

ATTO is headquartered in Tokyo, Japan with a network of the branch offices to be established in such Asian cities, as Beijing, Shanghai, Tianjin, Dalian, Xian, Hong Kong, Taipei, Bangkok, Singapore, Kuala Lumpur, Jakarta, Manila and Hanoi.

Business Objectives

1. Upload and download services (Free) of cutting edge technology and/or product via the Web Knowledge XPO (WKX)

- Upload & download of techno video information on the cutting edge technology.
- Assisting members in creating & uploading video based information on technology and/or products via WKX.-Innovation Service Provider
- Providing technology assessment to the Web Knowledge XPO(WKX)
- Business match making : alliance, cooperation, investments, M&A and others

2. Providing opportunities for human resource developments and training for professionals in the fields of technology and research & developments

- Education and training of technology transfer specialists in close collaboration with U.S. and European organizations
- Human resource developments for corporate professional engaged in short, intermediate or long term research projects
- Human resource development programs geared toward specialists in the fields of environment and energy development and implementation of training programs for high technology specialists
- Introduction of world renowned certifications and their associated training programs

3. Planning, dispatching and arrangements of technological, research oriented, and industrial study missions

- Arrangements of seminars and technical visits to various Japanese and U.S. corporations and research centers for Asian study missions
- Organization dispatching, and arrangements for Asian new project finding missions
- Follow up care services of study missions

4. Registration, placement and recruiting services for technology specialists

- Creating the data base of technical specialists for North-South/South Cooperation
- Placement and recruiting services for Nuclear Power Generation engineers (NPG Engineers)
- Support services for registered engineers and scientists
- Developments and implementation of consulting and feasibility studies

5. Developments of other technology transfer related programs in Asian region

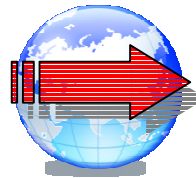

- Technology transfer
- Corporate transfer
- Factory transfer
- Patents/license transfer
- R&D transfer
- Retail transfer
- Science transfer
- Network transfer
- ICT transfer
- Others

Objectives and Lines of Business II

[Founding Philosophy]

「Technology is a common heritage of all mankind.」
「There is but one world of technology.」

[Business Goal]

To help accelerate the pace of evolution of knowledge economy in Asian nations.
To promote economic developments in Asian nations via technology transfer.

Techno Video Sharing Site Web Knowledge XPO Business

— Innovation Service Provider —

- Techno Video Web Portal Site (Sell Tech / Buy Tech)
- 1.Video Uplink & Linkage (Free)
 - 2.SDI (Requested Video) Service (Pay Service)
 - 3.B to B Advertisement
 - 4.Pay Per Click Advertisement

Business Negotiation/ Ordering Site B·M Site (Business Matching Site) Via NGN Network

Business Negotiation, Order, & Discussion via Video Conference

Individual/Group· Study Missions Dispatching/Receiving Business

- Receiving Technical Study Missions
- 1.Subject Specific Study Missions· Research & Arranging Recipient Companies
 - 2.Arranging Technical Visits For Asian Study Missions
 - 3.Business Opportunity Conference & Symposiums

Engineers/Professionals Recruiting/Placement Services

- Engineers/Professionals Recruiting/Placement Via Web Portal Site
- 1.Building Data Base of Engineers/Professionals (Engine Pro)
 - 2.Recruiting/Placement of NPG Engineers
 - 3.Dispatching Engineers to Asia, Middle Eastern and African Nations for North to South Cooperation
 - 4.International Certification Business
 - 5.Human Resource Developments for High Tech Industry

Promotion of Technology Transfer, Business Matching & M&As

Sales & Purchasing Of Technology, Intellectual Property, and High Tech Products and Services Via Web Portal Site
Promotion of Business Matching and M&A s

Web Knowledge Xpo (WKX)

Web Knowledge Xpo (WKX) is a video sharing portal site focusing on innovative technologies/products. WKX provides “Open Innovation Platform”, where buyer and seller meet. It helps reach target audience for opportunities for technology transfer/matchmakings.

WKS's goal: Visualize your technology asset and make them available for potential users.(Zoom-in/Zoom out)

“Visualization of Technologies”

“Technology Branding”

- Portal site registrants of organization s of small & medium size enterprises
- Administrators /members of national organizations for promotion of cooperation between different industries/disciplines
- Participants of techno video contests
- internet advertisers
- Web users/content providers
- Products information providers/advertisers
- Business entities/professional organizations
- Universities, technology license organizations(Technology transfer organizations)
- Domestic/International conventions exhibitors
- Domestic//international technology conventions exhibitors
- Banks, life & causality insurance, security and other financial related companies
- Video contents providers of domestic/international vide sharing sites
- Intellectual property managements and public relations personals of Private research institutes/companies

Introduction to Asia Technology Transfer Institute(ATTI)

— Toward the Creation of Asian Intellectual Community —

ATTI's founding philosophy is based on the belief that there is but one world of technology.
The world is the heritage of all mankind and should be, therefore, united.

Asia economy is expected to be an engine of growth for the world economy, thereby increasing technology competence as well as human resource developments for engineers/professionals. ATTI is dedicated to creating a highly efficient and innovative network of technology transfer which are responsive to the present and future needs of Asian engineers and scientists. ATTO disseminates new developments in the constantly changing world of technology and science, and fosters interaction and networking among Asian engineers/scientists beyond the boundaries of nations and professional disciplines. ATTO also facilitates the development and implementation of education & training programs as well as the arrangements of joint venture partnership ATTO is headquartered in Tokyo, Japan with a network of the branch offices to be established in such Asian cities, as Beijing, Shanghai, Tianjin, Dalian, Xian, Hong Kong, Taipei, Bangkok, Singapore, Kuala Lumpur, Jakarta, Manila and Hanoi.

【Asia Technology Transfer Institute(ATTI) Activities】

1. To promote effective technology transfer for the reinforcement of the economic industrial basis demanded by ATTI's participating entities in Asian nations.
2. To encourage joint collaboration among specialized technology groups in Asian nations in an effort to help develop technology as well as to promote research for ATTI's participating entities.
3. To promote dialog and discussions on technological issues as well as information and knowledge exchange among ATTO's participating entities.
4. To introduce advanced industrial technology and instructors from Europe, U.S. and Japan and other advanced nations and have discussions on the transfer and exchange of industrial technology in each country.
5. To train specialized instructors of technological research and development of the industrial technology sector in each country.
6. To promote and implement the activities relevant to the aforementioned.

Committee of ATTO

<Advisors>	Shinji Fukukawa, Kazuo Noda, Kunihiko Ukifune,	Chairman, TEPIA Foundation (Former Vice Minister of Ministry of Economy Trade and Industry (METI) Honorary President, Tama University & President of Japan Research Institute Ph.D., Chairperson of Board of Directors, CEO, The Gikei Group of Colleges
